

RenovaRP[®]

Paracentesis Management System

Improves All Aspects of Paracentesis Procedures

Enhances Patient Safety and Satisfaction

- Peristaltic pump provides gentle, continuous flow
- Closed and clean system reduces risk of exposure
- Adjustable speed offers full control of patient comfort
- Patient satisfaction through a fast procedure¹

Easy on Staff

- Closed and clean system reduces risk of exposure
- Light, portable system goes virtually anywhere
- Dual bag system means no need to stop and start
- Pre-assembled sterile kit

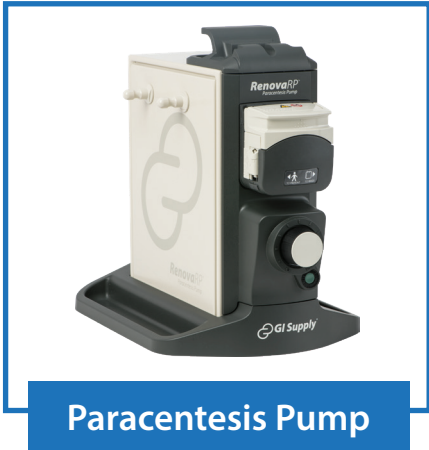

Cost Effective

- No need for evacuated bottles or canisters
- Fast, efficient procedures save time and labor
- Clear return on investment and meaningful reimbursement
