

Improve the Paracentesis Experience for You and Your Patients

A unique approach to paracentesis.

The RenovaRP Paracentesis Pump is a unique alternative to vacuum bottles and wall suction.

Enhances Patient Safety and Satisfaction

Peristaltic pump provides a fast, gentle procedure
Adjustable speed for control of patient comfort

Easy on Staff

Dual bag system, no bottles or canisters to change
Light and portable with a pre-assembled sterile kit

Cost Effective

Fast, efficient procedures save time and labor
Meaningful return on investment

I love our Renova Pump. With Renova, it usually takes half the time to remove the fluid as compared to when we used wall suction. We can give our patients some of their day back since they don't have to be in the hospital as long and they really appreciate it.
